

SmartPLAN™

The digitalization of well and rig operations. The SmartPLAN™ tool seamlessly manages both the operator's and drilling contractor's workflows to deliver digital drilling recipes that optimize efficiency and improve performance.

Customizable.**

Automation Compatibility

The SmartPLAN™ task manager integrates seamlessly with automation tools like SmartDRILL™ and SmartSLIDE™ systems to trigger automation through pre-determined events in the well plan or at a defined depth.

Consolidated Workflows

Enable digitalization of the operator's and drilling contractor's workflows. This maximizes efficiency and promotes transparency in the drilling process. Step-by-step driller instructions are presented on an intuitive user interface.

Incorporate Best Practices

The SmartPLAN™ recipe manager incorporates drilling recipes that are configured to reflect industry-wide best practices and lessons learned from previous operations. This unique feature promotes consistency and produces repeatable results.
